Quick Start Guides: MultiLine Mobile Android apps

Last Modified on 02/08/2024 10:41 am EST

The quick start guides below provide a basic introduction to the Android mobile app. For iOS, see
[Quick Start Guides: MultiLine Mobile iOS apps](https://help.moviuscorp.com/help/quick-start-guide-multiline-ios) (https://help.moviuscorp.com/help/quick-start-guide-multiline-ios)

> We are currently working to offer additional Android Quick Start Guides.

How to pick your Quick Start Guide

Because there are multiple ways that your company can set up MultiLine, we offer different types of guides.

- **Type** column allows easy communication about the guides available
- **Description** column provides information about the content of the guide
- **App** column tells you which apps are supported (MultiLine, Movius for BlackBerry, MultiLine for Intune)
- **Download** column provides a link for downloading the guide

We offer guides that include activation and those that do not and only cover the various features and screens available for use.

For the guides that include activation, companies have different options as to how to set this up for their users. Read the description to determine which type of guide your end-users need.

- Users receive emails with QR codes. (Scan QR)
- Users activate using SSO (SSO)
- Users must verify their number with an OTP PIN code (OTP PIN Verification)
- Users do not verify their number with an OTP PIN code (No OTP PIN Verification option)

All Quick Start Guides for Android
