

# MultiLine Messaging for Microsoft Teams | 2024.03.16 | Release Notes

Last Modified on 03/19/2024 10:07 am EDT

**Pre-Release Notice:** Please note that the features listed for this release are still in process of being tested. Movius reserves the right to cancel or postpone the release of these features or to modify release dates. Furthermore, this content does not include private customer-specific developments.

Read on to learn what's new with MultiLine Messaging for Microsoft Teams.

## MultiLine for Microsoft Teams Release Notes

Deployment Date: March 16-17, 2024

### What's New?

#### Display validated phone number for WeChat and LINE conversations

When WeChat and LINE users initiate conversations with a business using the guest phone number validation feature, the Movius bot validates the phone number of the user before connecting them to the MultiLine user. With this release, the validated phone number now appears below the contact name at the top of the messaging thread. This allows the MultiLine user to easily view the phone number associated with the person they're chatting with.

For more information on the guest phone number validation feature, see [WeChat: Phone Number Validation Flow](https://help.moviuscorp.com/help/wechat-phone-number-validation-flow) [↗](https://help.moviuscorp.com/help/wechat-phone-number-validation-flow) and [LINE: Phone Number Validation Flow](https://help.moviuscorp.com/help/line-phone-number-validation-flow) [↗](https://help.moviuscorp.com/help/line-phone-number-validation-flow). Note: Customer reader account required to view.
