Utilization Threshold

Utilization Threshold is the upper limit (in percentage) of numbers that can be utilized before the system notifies the Administrator that they have utilized the maximum assigned threshold. After this threshold is met, another notification will be sent every time the administrator assigns a new number - until all the available numbers are utilized.

You can edit the Utilization Threshold percentage value to be anywhere between 1% and 100%.

1. Click the Edit icon to pull up the Manage Threshold menu.

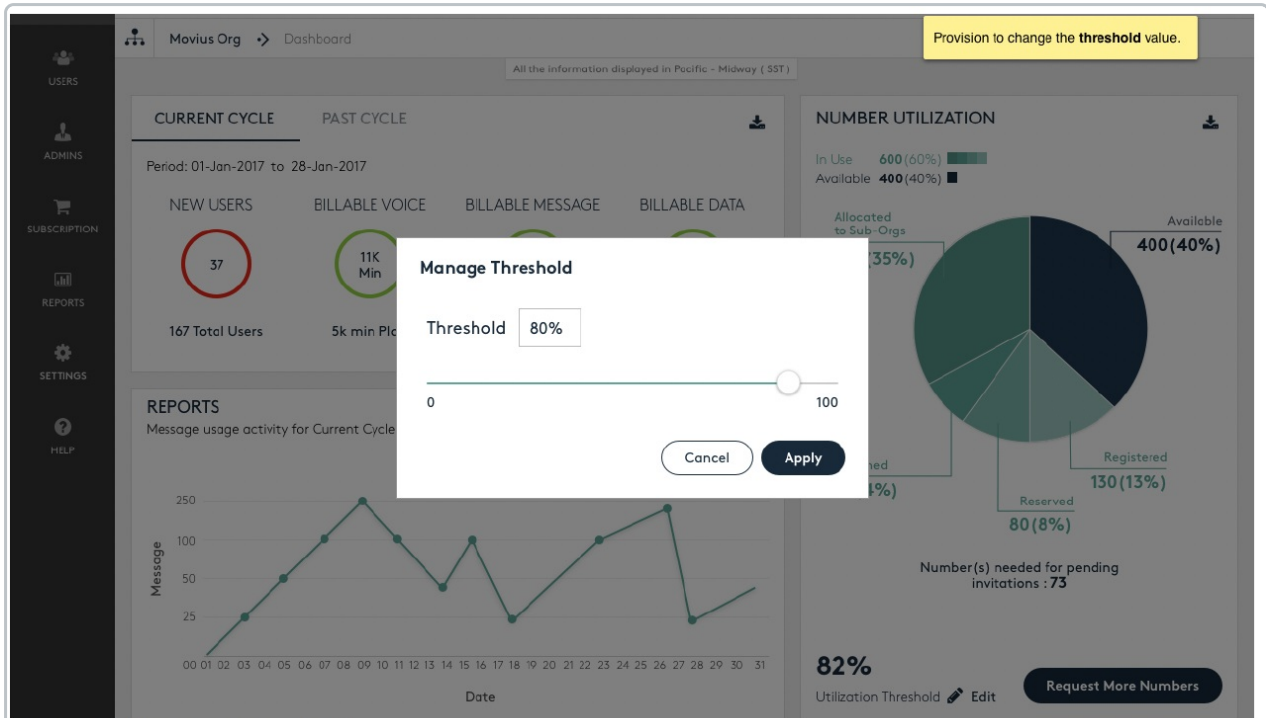

Figure 9: Manage Threshold

Example: The Utilization Threshold is assigned as 80%. This means that whenever the Number Utilization percentage reaches 80%, the administrator will receive an email notifying them that the maximum assigned threshold has been reached.
