

Add Movius for BlackBerry to BlackBerry Control

Last Modified on 03/09/2023 10:48 am EST

If the Movius for BlackBerry app doesn't appear automatically in your organization, you may need to add it to your Control server from the public store.

Add Movius for BlackBerry to BlackBerry Control Server

1. Go to **Manage Apps** and click **Add App**.

Manage Apps

ENTERPRISE

Filter: Name / GD Entitler

70 Apps

OS: 3% iOS, 9% Android, 9% Both, 79% Other

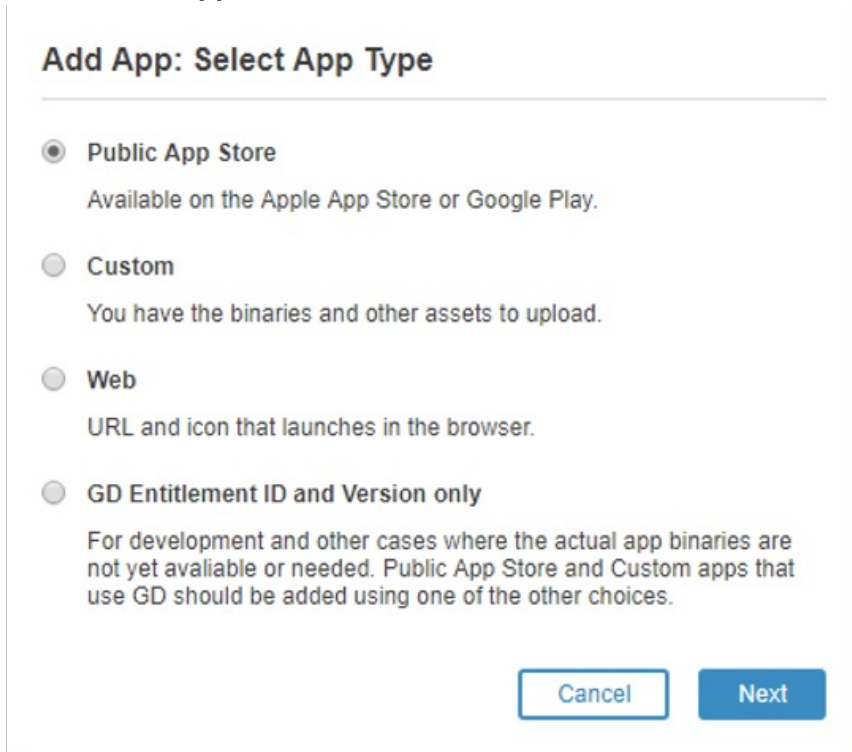

Form Factor: 20% Universal, 80% Unknown

GD/Non-GD: 6% Non-GD, 94% GD

Source: 9% Public Store, 11% Custom, 80% GD ID Only

Add App

2. Select **Public App Store**.

Add App: Select App Type

- ☒ **Public App Store**
Available on the Apple App Store or Google Play.
- ☐ **Custom**
You have the binaries and other assets to upload.
- ☐ **Web**
URL and icon that launches in the browser.
- ☐ **GD Entitlement ID and Version only**
For development and other cases where the actual app binaries are not yet available or needed. Public App Store and Custom apps that use GD should be added using one of the other choices.

Cancel **Next**

3. Enter Public Store URL: <https://apps.apple.com/us/app/movius-for-blackberry/id1291542514> and click **Next**.

MOVIUS

Enter Public Store URL

Enter a URL for an app on Google Play or the Apple App Store.

<https://itunes.apple.com/us/app/movius-for-blackberry/id1291542514?mt=>

Cancel

Next

4. Click **Add App**.
