Why do I need to install Company Portal?

The Intune Company Portal provides you access to corporate apps and resources.

- You need to set up Intune Company Portal App before installing MultiLine for Intune and other Work apps.
- During the initial setup, the app requires that you authenticate yourself with your organization. It then informs you of any device settings you must upgrade. *For example, organizations often set minimum or maximum character password requirements on your device.*

For more information, see What is device enrollment? [External Link].
