

Enable Microsoft Teams for a user

Last Modified on 07/22/2022 10:28 am EDT

Read this to learn how to enable Microsoft Teams integration for users who will use the same number for Microsoft Teams and MultiLine.

Overview

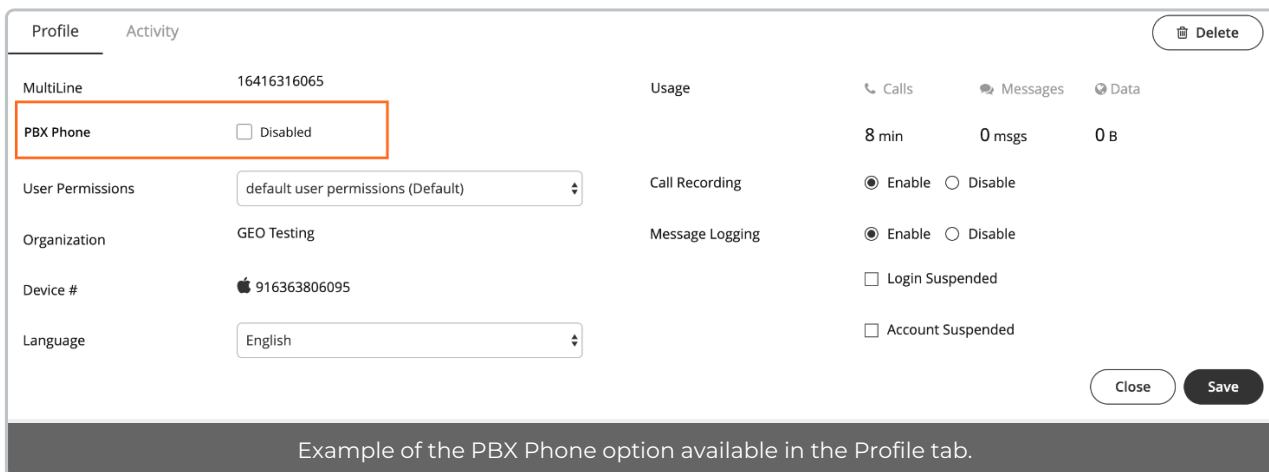

Enabling Microsoft Teams integration will allow for the user's mobile phone and Microsoft Teams integration to ring simultaneously, so the user can pick up the call at their desk or when they're mobile. *Note: Microsoft Teams integration is disabled by default.*

Before you start

- Organizations do not have the option to enable Microsoft Teams by default. If your organization hasn't opted for this feature, you'll be unable to follow the steps below. Contact your Customer Success Team for more information.
- An admin must have "Accounts" Role in the organization to do these instructions. See [What Admin Roles are in the Management Portal](https://help.moviuscorp.com/help/what-admin-roles-mmp) (<https://help.moviuscorp.com/help/what-admin-roles-mmp>).

Enable Microsoft Teams

1. When adding a user or editing a user, go to a User's **Profile** tab.
2. Click on the checkbox for **PBX Phone** to enable. *Note: we are using the PBX Phone connector to establish the connection to Microsoft Teams.*
3. Click **Save**.

The screenshot shows a user profile page with a 'Profile' tab selected. The 'PBX Phone' option is highlighted with a red box and is currently disabled. The page includes various settings like MultiLine, User Permissions, Organization, Device #, and Language. There are also usage statistics for Calls, Messages, and Data, and options for Call Recording, Message Logging, Login Suspended, and Account Suspended. A 'Delete' button is in the top right, and 'Close' and 'Save' buttons are at the bottom right.

Example of the PBX Phone option available in the Profile tab.

See [Using Microsoft Teams Integration](https://moviuscorp.knowledgeowl.com/help/using-microsoft-teams-integration) (<https://moviuscorp.knowledgeowl.com/help/using-microsoft-teams-integration>) for information on the user experience.
