

# Click-to-Dial numbers and conference codes - MultiLine

Last Modified on 11/14/2023 3:18 pm EST

Read on to learn about Click-to-Dial.

Notice to iOS users: If you're facing issues dialing conference codes, please upgrade to the latest version of iOS. [See this bulletin \(https://help.moviuscorp.com/help/click-to-dial-support-on-ios-154\)](https://help.moviuscorp.com/help/click-to-dial-support-on-ios-154) for more information.

## What is Click-to-Dial?

The Click-to-Dial feature automatically detects and renders phone numbers as links, and allows users to simply click the link to initiate a call using MultiLine. This includes calling contacts, numbers in emails and other apps, and conference bridges.

For conference bridges, Click-to-Dial allows users to avoid dialing lengthy numbers and PINS, because with a single click, MultiLine apps dials the number, characters (including # or \*) and additional digits in the dial string, such as Conference Codes and PINS.

## How do I use Click-to-Dial?

When you see a clickable phone number or conference number, simply click the link. The dialer will pre-populate with number and then you need only tap the **Call** icon to place the call.
