### What's new in the Platform

- **SMTP Configurable Subject** - To meet the requirements of certain archival solutions, we're adding the ability to configure EML message subjects. *Documentation available on request.*
- **Adding WhatsApp Messaging Connector to MultiLine Desktop** - Users enabled with WhatsApp Messaging Connector will soon be able to send messages from mobile or desktop apps.

## What's new in the API and CDRs

*Documentation available on request.*

- **Administrator Provisioning API** - API to automate adding, modifying, and deleting administrators in the Movius Management Portal
  - **Changes to Bulk Invite .CSV** - When inviting Multiple Accounts using the Bulk Invite CSV, admins will now be able to assign numbers and whether call recording or message recording is enabled. See [Send MultiLine Invitations \(Add users\)](https://help.moviuscorp.com/help/send-multiline-invitations-add-users) [↗](https://help.moviuscorp.com/help/send-multiline-invitations-add-users) (<https://help.moviuscorp.com/help/send-multiline-invitations-add-users>) [↗](https://help.moviuscorp.com/help/send-multiline-invitations-add-users)
  - **Drift Management** - Customer Admins will be able to offload Admin Change Activity Logs. This allows them to document changes to the organization.
-
