### What's new with all MultiLine Apps?

#### ARYA Customer Feedback - New Options

If an organization chooses to enable ARYA Customer Feedback, their users are prompted after calls to provide feedback (See [Arya: Providing Call Quality Feedback Product Document](https://help.moviuscorp.com/help/arya-product) (<https://help.moviuscorp.com/help/arya-product>) ). The feedback is ingested by an AI-powered tool that identifies potential issues that will improve call performance.

In this release, we've added more options for users to select from to describe problems with a call, including an "Other" option that allows the user to enter their own reason if none of the provided options apply.

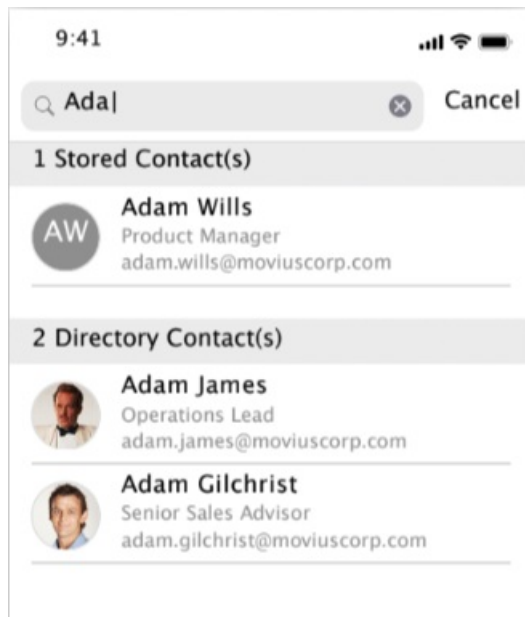

Movius provides a set of default options (Call Dropped, Could not hear the other party, Call/Speech Delay, Spam Call, Other) and can configure custom options for customers by request.

#### Contacts Search Enhancement

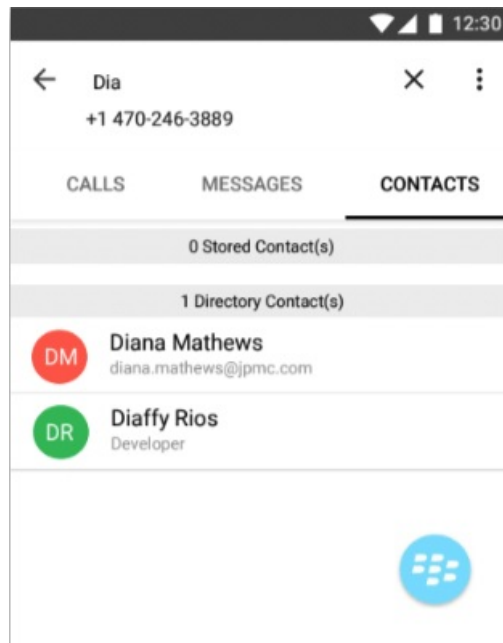

Currently, when a user searches their contacts list only the first name and last name of a contact display. This could cause confusion if there are two members in a Contacts list with the same or similar name. Now, more details will display including:

- Email Address
- Job Title

iOS

Android
