Release Notes | MultiLine for Salesforce | Oct 21st

Last Modified on 01/30/2023 11:24 am EST

What's new in MultiLine for Salesforce?

- **UI Fixes:**
    - Added Call icon to Ongoing Call Screen
    - Updated Template icon
    - Added Hint Text "Type Number Here" to dial pad
    - Changed "Recent" Icon to "Call Icon" on dial pad
- **UI Enhancements**
    - Dial pad Interface Improvements
    - Settings Interface Improvements
    - Task Log Interface Improvements
    - During an incoming and outgoing call from a new number, user can now add the contact, lead, or account directly within MultiLine for Salesforce
    - New alert for incoming text on ML for SF app must be indicated by a notification icon
    - User can now enable and disable the push notification for incoming texts/ calls using a toggle button.
        - If the push notification is enabled, user can adjust the ringing volume for calls and sound for incoming texts on a scale of 0-5 (5 being the highest).
