Answers to common questions about using MultiLine internationally.

How do I avoid roaming costs when I'm traveling for work?

You can set MultiLine to receive calls and texts only when you're connected to a Wi-Fi network. This feature lets you keep roaming costs in check when using your personal phone in a foreign country. You'll just need to make sure you're connected to a Wi-Fi network.

How to set Wi-Fi Only mode

Go to Call Settings, then tap the **Wi-Fi Only** toggle. This will automatically grey out other options.

For more information on call settings, see [Call Settings: Set Data or Minutes calling modes](https://help.moviuscorp.com/help/call-settings) (<https://help.moviuscorp.com/help/call-settings>) .

Note: Employers may choose to reimburse employees for roaming charges, or for purchasing a temporary international calling plan prior to travel.
