

Click-to-Dial numbers and conference codes

Last Modified on 10/15/2024 4:14 pm EDT

Read on to learn about Click-to-Dial in MultiLine mobile apps.

Overview

The Click-to-Dial feature automatically detects and renders phone numbers as links, and allows users to simply click the link to initiate a call using MultiLine. This includes calling contacts, numbers in emails and other apps, and conference bridges.

For conference bridges, Click-to-Dial allows users to avoid dialing lengthy numbers and PINS, because with a single click, MultiLine apps dials the number, characters (including # or *) and additional digits in the dial string, such as Conference Codes and PINS.

Using Click-to-Dial

When you see a clickable phone number or conference number, simply click the link. The dialer will pre-populate with number and then you need only tap the **Call** icon to place the call.
