

About MultiLine Messaging for Teams

Last Modified on 11/01/2024 10:47 am EDT

When your organization uses MultiLine Messaging for Microsoft Teams, you can message from your MultiLine number in Microsoft Teams.

Employees can easily send and receive messages from their work number and have all external communications organized in one place. New messages can be initiated, and ongoing conversations remain accessible and fully searchable, making it simple to stay connected with clients, partners, and other contacts without leaving Teams.
