

Set Up Data Only Onboarding

Last Modified on 06/17/2024 12:41 pm EDT

Read on to learn how to enable Data Only Onboarding for a set of users.

Overview

An organization may have a group of users that do not have access to a cellular network. Commonly, this applies to iPad and Android tablet users. Data Only Onboarding is a method of user activation that allows these users to activate and use MultiLine entirely using a WiFi or Data network. Users will only have the ability to call over data and not the cellular network.

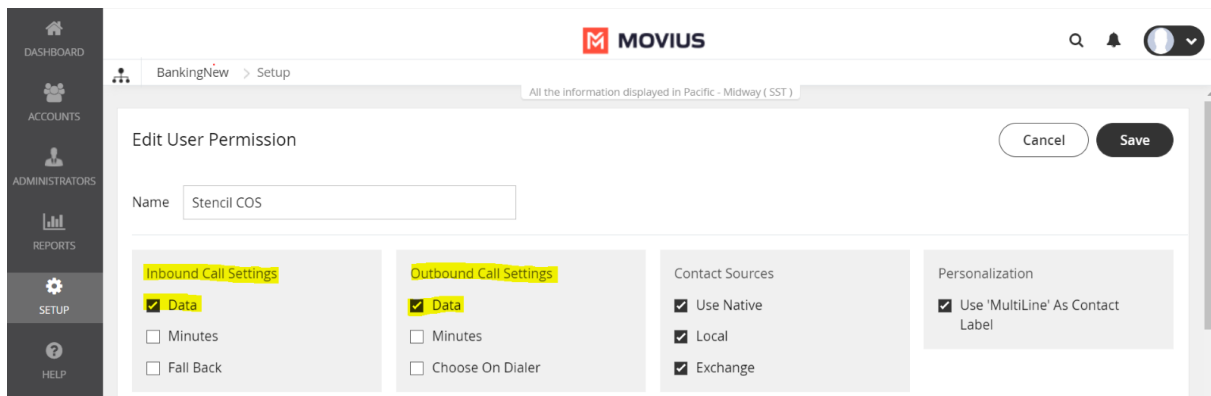

Before you start

- An admin must have "Setup" Privilege in their Role in the organization to do these instructions. See [What Admin Privileges are in Management Portal?](https://help.moviuscorp.com/help/what-admin-roles-mmp) (<https://help.moviuscorp.com/help/what-admin-roles-mmp>)

Enable Data Only onboarding

To enable Data Only Onboarding, you'll need to set user permissions. For more details see [Create user permissions](https://help.moviuscorp.com/help/set-user-permissions) (<https://help.moviuscorp.com/help/set-user-permissions>).

1. Go to **Setup** then **User Permissions**.
2. Edit or create a new user permission.
3. Select **only Data** for **Inbound Call Settings** and **Outbound Call Settings**. Deselect **Minutes** and **Fallback**.

4. For MultiLine users, make sure **Enable E-Mail PIN** is selected in the **Onboarding** section. For MultiLine for Intune users, this can be left unselected.
