

Is Movius SOC Certified?

Last Modified on 11/14/2023 12:45 pm EST

All MultiLine data is encrypted both in transit and at rest, and meets all SOC 2 compliance requirements. Additionally, a security pin can be enabled within the settings of the app, forcing users to enter a pin prior to launching the application. SOC 3 Report available on request

All business contacts and communications are completely separate and secure, even on an employee's personal phone. MultiLine encrypts voice and text messages, and only very basic call information is stored on the device. The MultiLine app is secured with the same software used to protect the data in other enterprise mobile apps, and the app can be deleted from an employee's personal phone in seconds.
