

# Set the default country calling code

Last Modified on 10/16/2024 3:10 pm EDT

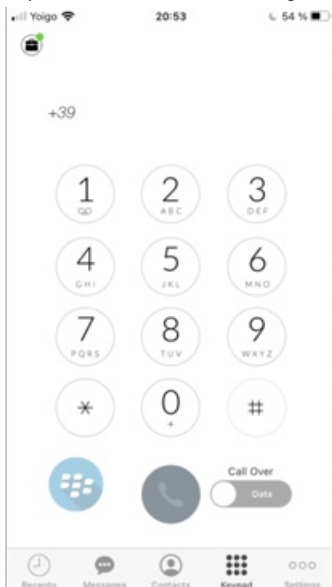

Read on to learn how to set the default country calling code.

## Overview

A country calling code, or country dial-in code, is a prefix dialed before the telephone number when placing an international call. For example +39 is the calling code for Italy. By default, the prefix will reflect the country code of your MultiLine number.

## Set the default country code

1. Open the dialer.
2. Tap the current country code (example below: +39).

3. Tap from the list to select the desired country calling code.
