

Activating MultiLine iOS - Data Only

Last Modified on 05/22/2026 12:17 pm EDT

If you are using a tablet or iPhone that does not have cellular connectivity, these instructions are for you.

Everything you need to get started will be sent to you in a MultiLine invitation. You can use it to start the activation process.

Step 1: Get your invitation

- Expect an invitation to be sent to your work email. *Please don't reply to this email, as it is auto-generated.*
- Your invitation will contain a **Download and Activate** button, a **QR code**, and credentials for activating MultiLine manually.

Sample Email below:

Hi Melanie Allen,
Welcome to Multiline!

Mobile App:

- On your iPhone or Android, tap the button below:

Download and Activate

- On your computer, use your phone's camera or QR reading app to scan the QR code below:

- To manually activate, click this [link](#) to download the app and enter the credentials below during onboarding:
Company Id : AQUT [REDACTED]
UserName : Melanie.Allen@moviuscorp.com
Password : [REDACTED]

Desktop App:

- To access [MultiLine Desktop](#), click this [link](#) and enter the username and password mentioned above during onboarding. *Please note that you'll be requested to create a password when signing in to MultiLine Desktop for the first time.*

If you ever need to delete and reinstall the mobile app, you'll need this Password from the

invitation to activate it. If you lose your invitation, request a new one from your IT administrator.

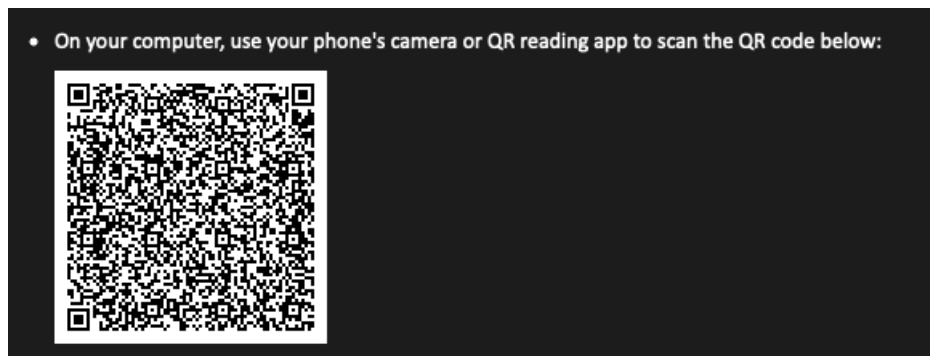

You receive MultiLine invitations from your IT organization, not Movius. Movius cannot send you invitations.

You have multiple options for activating MultiLine on your mobile device:

- **If you are opening your email on your phone** , tap the **Download and Activate** button.
 - It will check if the MultiLine app is installed on your phone and begin installation if not. The activation process will begin immediately.

- **If you are opening your email on your desktop or tablet** , take out your phone camera and tap the **QR code**. **Note: Not available for MultiLine for Intune.**
 - It will check if the MultiLine app is installed on your phone and begin installation if not. The activation process will begin immediately.
 - If you've already downloaded MultiLine, you can also scan the QR code using MultiLine by opening the app and granting the Camera permission.

- If necessary, you can also activate manually by entering the details from your invitation. Click the **Activate Manually** link from the invitation or the first screen.

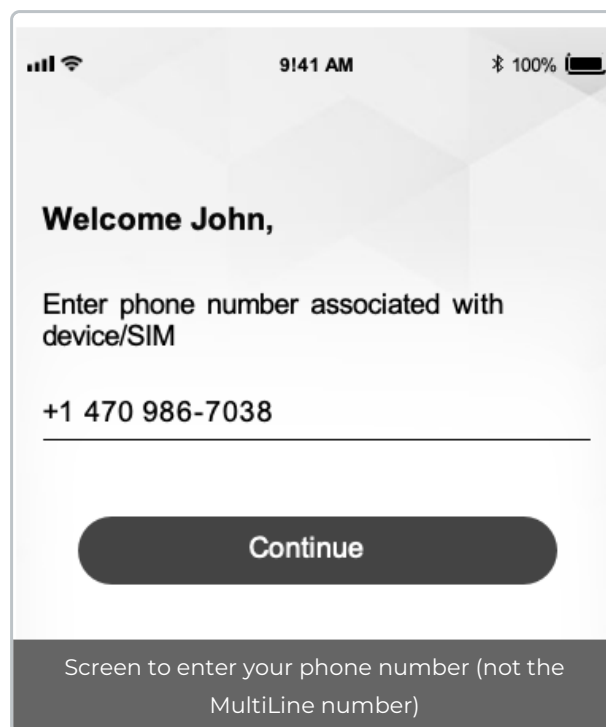

Step 2: Complete activation

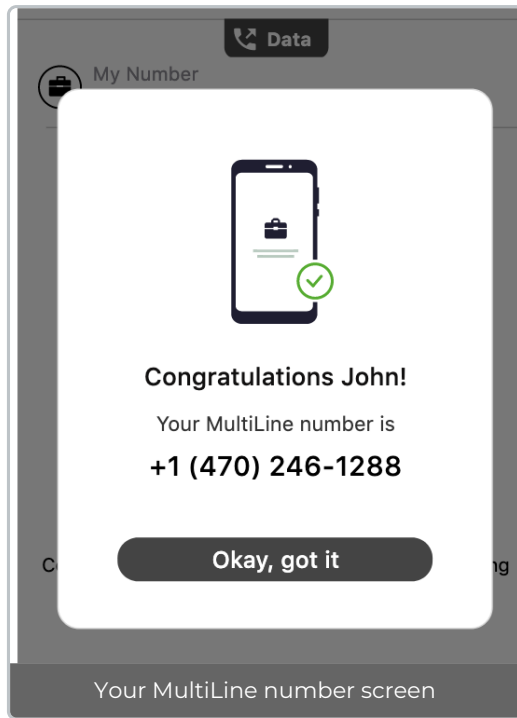

1. Read about the permissions required for the app, then tap **Proceed**. *Note: MultiLine does not upload, store, transmit, or sell your Contacts information.*

2. Confirm in the next prompts (sent from your phone) that you will allow the permissions.
3. Some users will be prompted to have a one-time PIN will be sent to your mobile device. If so, enter the number of your personal SIM (your non-MultiLine number). Note: Your personal phone number and PIN verification is needed to verify the MultiLine app is being placed on a SIM-based device and allows the app to leverage minutes mode when needed. MultiLine's software-based technology works completely through the app itself and never touches your personal data or SIM information, including personal calls, messages, searches, and applications.

Your MultiLine number will display. Tap **Okay, got it** to continue.

That's it!
