MultiLine for Microsoft Teams Release Notes

Deployment Date: March 16-17, 2024

What's New?

Display validated phone number for WeChat and LINE conversations

When WeChat and LINE users initiate conversations with a business using the guest phone number validation feature, the Movius bot validates the phone number of the user before connecting them to the MultiLine user. With this release, the validated phone number now appears below the contact name at the top of the messaging thread. This allows the MultiLine user to easily view the phone number associated with the person they're chatting with.

For more information on the guest phone number validation feature, see [WeChat: Phone Number Validation Flow](https://help.moviuscorp.com/help/wechat-phone-number-validation-flow) [↗](https://help.moviuscorp.com/help/wechat-phone-number-validation-flow) and [LINE: Phone Number Validation Flow](https://help.moviuscorp.com/help/line-phone-number-validation-flow) [↗](https://help.moviuscorp.com/help/line-phone-number-validation-flow). *Note: Customer reader account required to view.*
