LINE Messaging

Last Modified on 03/19/2024 3:52 pm EDT

Teams

Read on to learn about LINE messaging from the MultiLine Messaging app for Microsoft Teams.

Overview

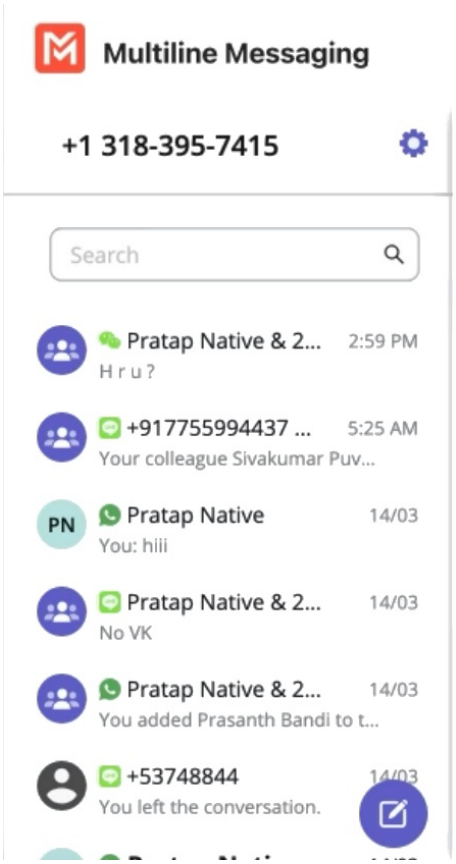
The MultiLine Messaging app for Microsoft Teams app allows you to message with LINE users. The LINE user must initiate the chat.

Before you start

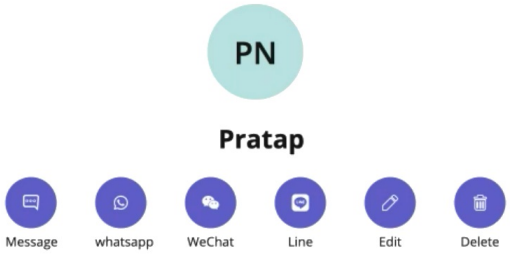
- Using LINE from MultiLine Messaging Microsoft Teams app requires it to be enabled by your MultiLine administrator.
- LINE users must initiate the conversation.

How it works

In your message threads, the LINE icon indicates the conversation is happening on LINE. Select the message to begin chatting.



You can find your LINE conversation with a contact by selecting the LINE icon from the Contact details screen.



You can also begin chatting by selecting the **New Message** notification.

Validated Phone Number feature

For regulated users, LINE users may have their phone number validated for verification purposes. You will see this validated phone number below the Contact Name.

Joe, what's a nice movie I can go watch and relax
10:18 AM
Well there's a few new releases at Netflix. Do you mind a full action type of movie?
10:21 AM
Yeah that should be fine
