

WeChat Group Messaging - Teams

Last Modified on 11/01/2024 10:22 am EDT

Read on to learn about group messaging in WeChat using the MultiLine Messaging App for Microsoft Teams.

Overview

MultiLine's WeChat Messaging Channel allows compliant WeChat messaging directly inside MultiLine. WeChat users receive messages from the MultiLine user as coming from an official WeChat business account.

Group messaging allows up to 10 MultiLine users to contact a single WeChat user. You can transfer the user to another MultiLine user, leave a conversation with that user, remove participant, or restart a conversation with that user.

Before you start

• Your organization has to enable the WeChat Messaging Channel for it to be available in MultiLine.

Group Messaging

To send a group message, go to your existing conversation with the user.

1. The **Details** menu is in the upper righthand of the screen, select the **i** icon to view.
