

## Version 4.03.01 | iOS

Last Modified on 07/31/2024 2:32 pm EDT

### Movius MultiLine iOS App v. 4.03.01 Release Notes

#### Production Deployment Schedule

- MultiLine for Intune iOS v. 4.03.01 | August 4, 2024
- Movius MultiLine iOS v. 4.03.01 | August 11, 2024

#### What's New?

##### WhatsApp Message Queuing

Meta policies for WhatsApp Business users, which includes MultiLine users, restrict the ability to send messages prior to receiving an opt-in message and after 24-hours have passed since the WhatsApp user has responded to the message.

Previously, MultiLine applications would only allow sending the template messages and not allow input into the text field during these scenarios. Now, MultiLine users can compose and send a configurable number of messages that will be held in a queue to be sent after the WhatsApp user opts in or reinitiates the conversation by sending a message. This enhances their productivity and allows the messaging experience to be more natural for both parties.

See [WhatsApp Message Queueing](https://help.moviuscorp.com/help/whatsapp-message-queueing) [for more details.](https://help.moviuscorp.com/help/whatsapp-message-queueing)

##### WeChat Message Queuing

WeChat policies for Official Accounts, which includes MultiLine users, disallow too many messages to be sent to WeChat users without a response from the WeChat user.

Previously, MultiLine applications did not have any restrictions on the number of messages sent by the user. Now, disclaimers inform both MultiLine users and WeChat of the policy. MultiLine users will be able to send a configurable number of messages that will be held in a queue to be sent after the WeChat user replies with a message. WeChat users will be reminded to reply to the message to keep the conversation going.

##### MultiLine companion app for Apple Watch

We're thrilled to announce that MultiLine will have a companion app available in the Apple Watch app store. The MultiLine app will keep you connected with calls, texts, and social messages on your wrist, ensuring business continuity. Supported on watches running Watch OS 10.1.

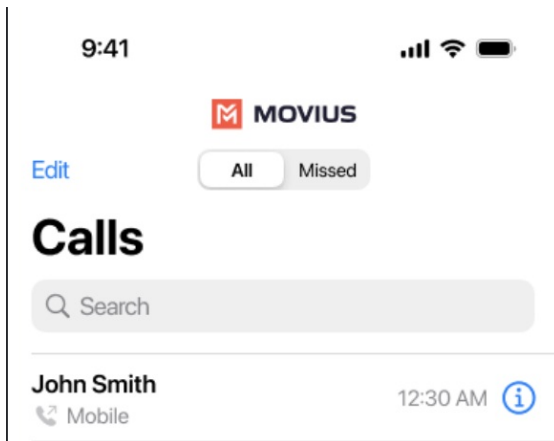

- Access your recent calls, messages, and contacts.
- Make, answer, reject, and hang up calls directly from your smart watch.
- Read and reply to SMS, WhatsApp, and group messages.

Users that have activated to this latest version of the MultiLine app on their mobile devices will simply need to install the MultiLine app from the Apple Watch app store to get started. *Note: Available only in standard MultiLine 4.03.01; not yet available in MultiLine for Intune 4.03.01.*

## User Experience Changes

We've implemented a couple of visual changes to screens of the app to improve user experience.

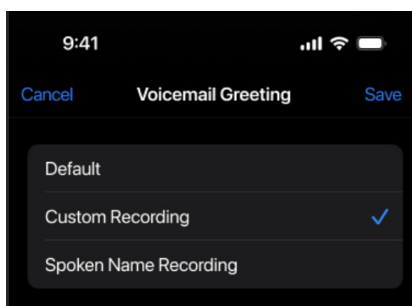

- The **Edit** action on the Calls screen is moved to the left-side.

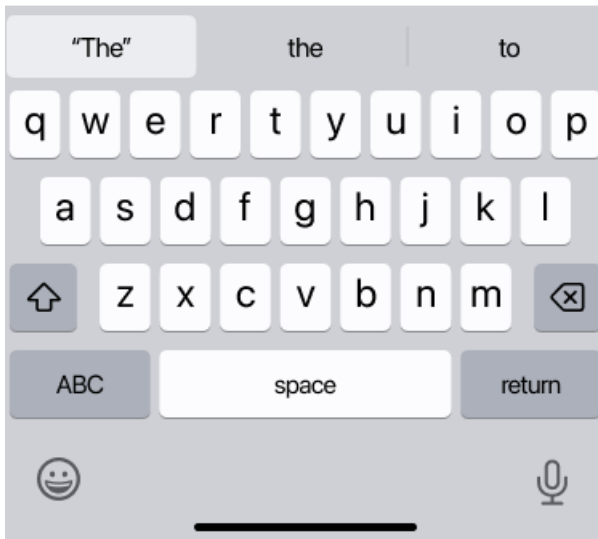

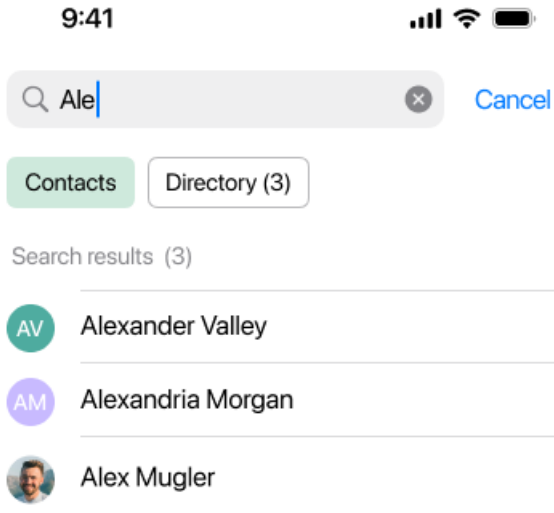

- After tapping **Edit** action on the Calls screen, **Done** and **Clear** actions appear.

- Change the color used for **Save** action on the **Voicemail Greeting** screen when using Dark Mode to improve visibility with a brighter, more contrasting value of blue.

- For those using Exchange Contacts as their Contact list source, when searching contacts the search may now be refined to Contacts or Directory.

### Bug Fixes
