

Version 4.03.01 | Android Release Notes

Last Modified on 07/15/2024 12:49 pm EDT

Movius MultiLine Android App v. 4.03.01 Release Notes

Production Deployment Schedule

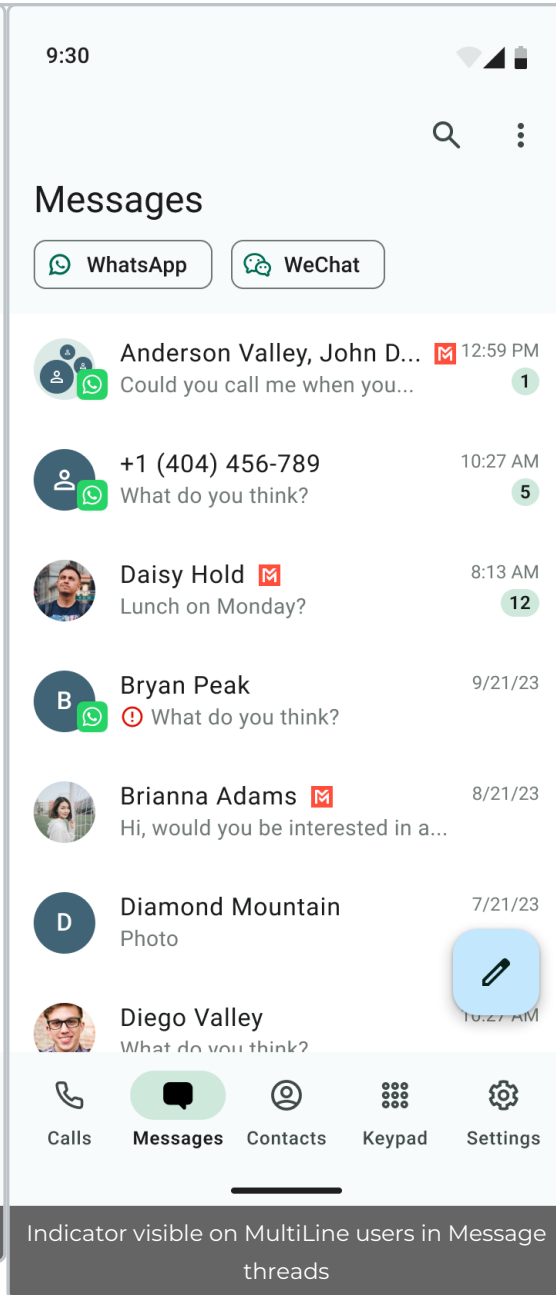

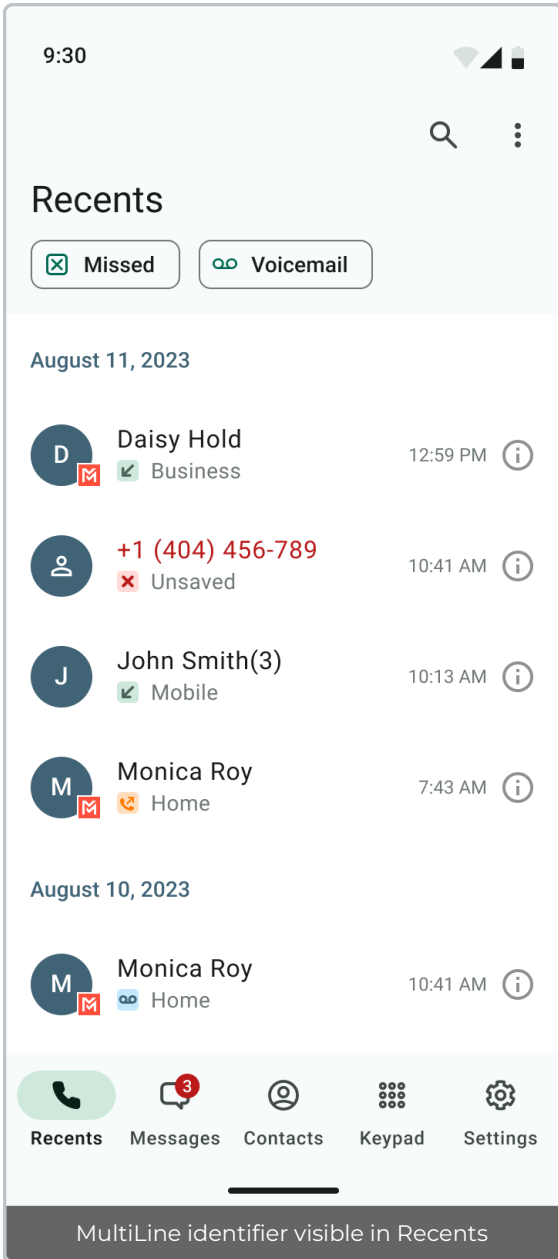

- MultiLine for Intune Android v. 4.03.01 | July 28, 2024
- Movius MultiLine Android v. 4.03.01 | August 4, 2024

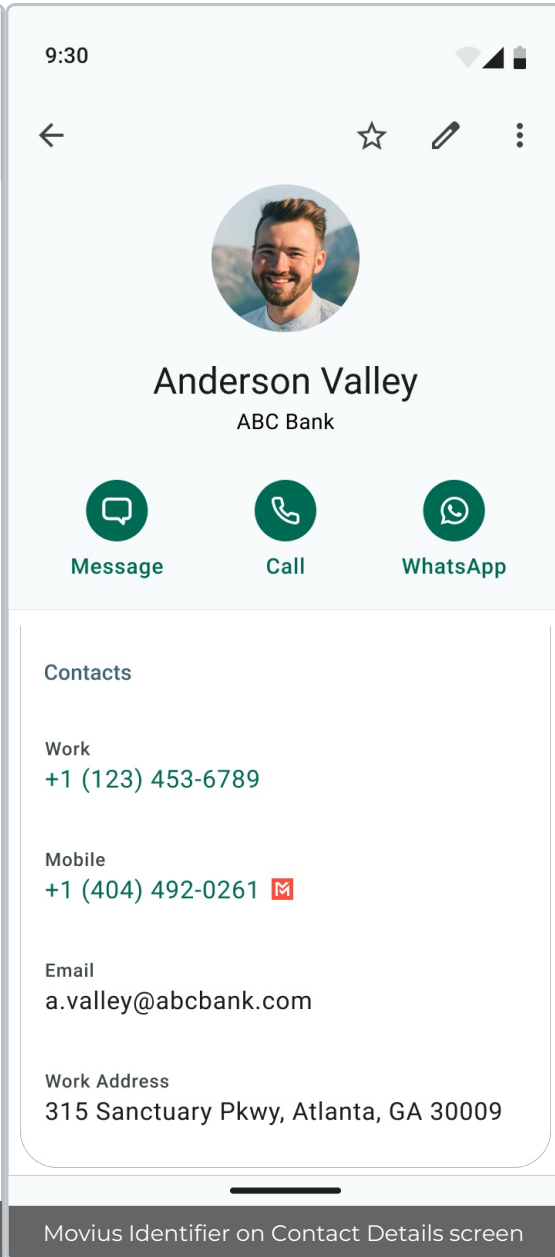

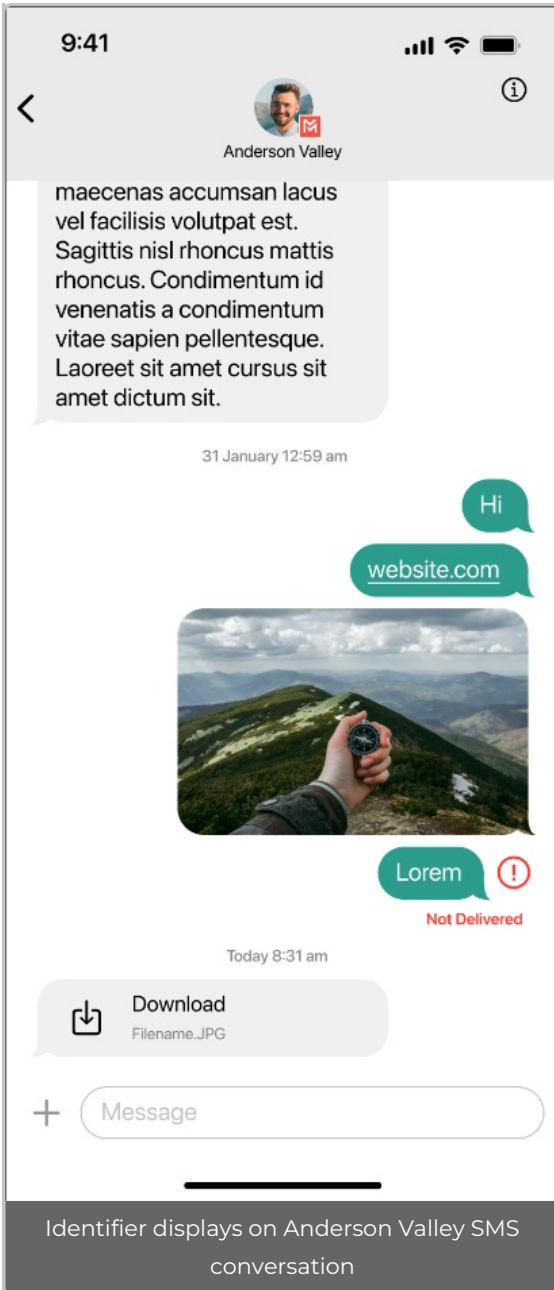

What's New?

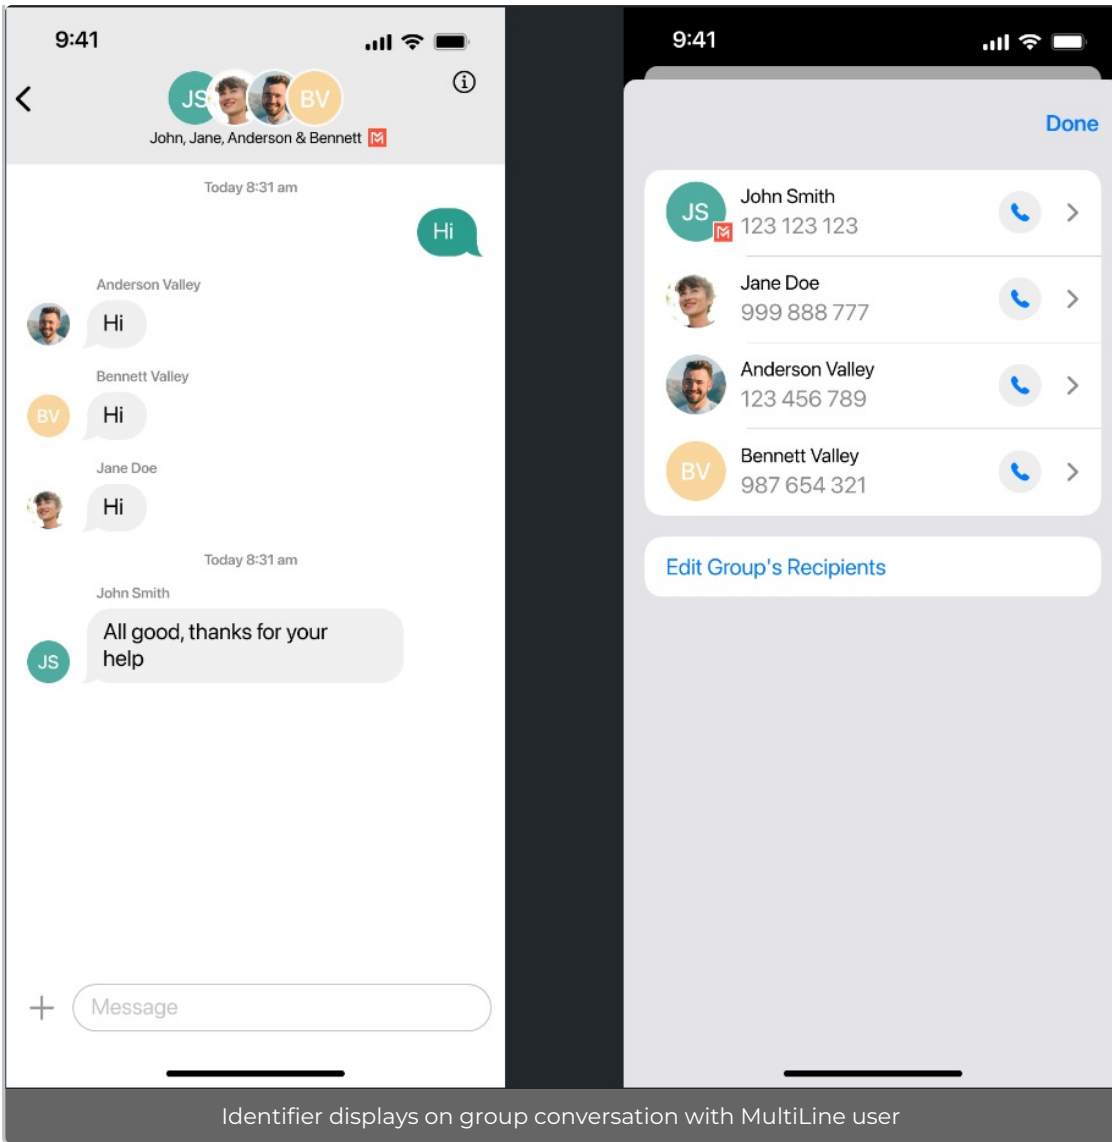

Movius Number Identifier

People use MultiLine to communicate with their clients, partners and co-workers. These clients, partner and co-workers are currently stored in Multiline as Local, Native or Exchange contacts. Today when communicating with coworkers, they need to call and message the MultiLine number of their co-worker rather than their personal.

The Movius identifier allows the end user to easily identify MultiLine users in the company across all regions where the company may operate.

Identifier displays on group conversation with MultiLine user

MultiLine companion app for Wear OS

We're thrilled to announce that MultiLine now has a companion app available in the Wear OS app store. The MultiLine app will keep you connected with calls, texts, and social messages on your wrist, ensuring business continuity. Supported on watches running Wear OS 4.

- Access your recent calls, messages, and contacts.

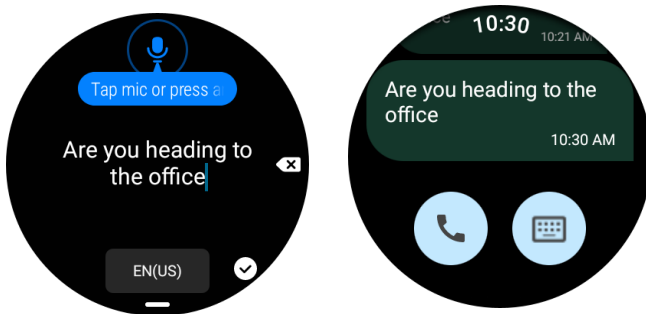

- Make, answer, reject, and hang up calls directly from your smart watch.

- Read and reply to SMS, WhatsApp, and group messages.

Users that have activated the MultiLine app on their mobile devices will simply need to install the MultiLine app for smart watches from the Play store to get started. *Note: Available only in standard MultiLine 4.03.01; not yet available in MultiLine for Intune 4.03.01.*
