WeChat Messaging in MultiLine Desktop

Last Modified on 06/27/2024 4:56 pm EDT

Read on to learn about sending WeChat messages in MultiLine Desktop.

Overview

With the WeChat add-on, MultiLine users can message with WeChat users.

Before you start

- Using WeChat from MultiLine Desktop app requires it to be enabled by your MultiLine administrator.
- WeChat users must initiate the conversation.

How it works

In your message threads, the WeChat icon indicates the conversation is happening on WeChat. Select the message to begin chatting.

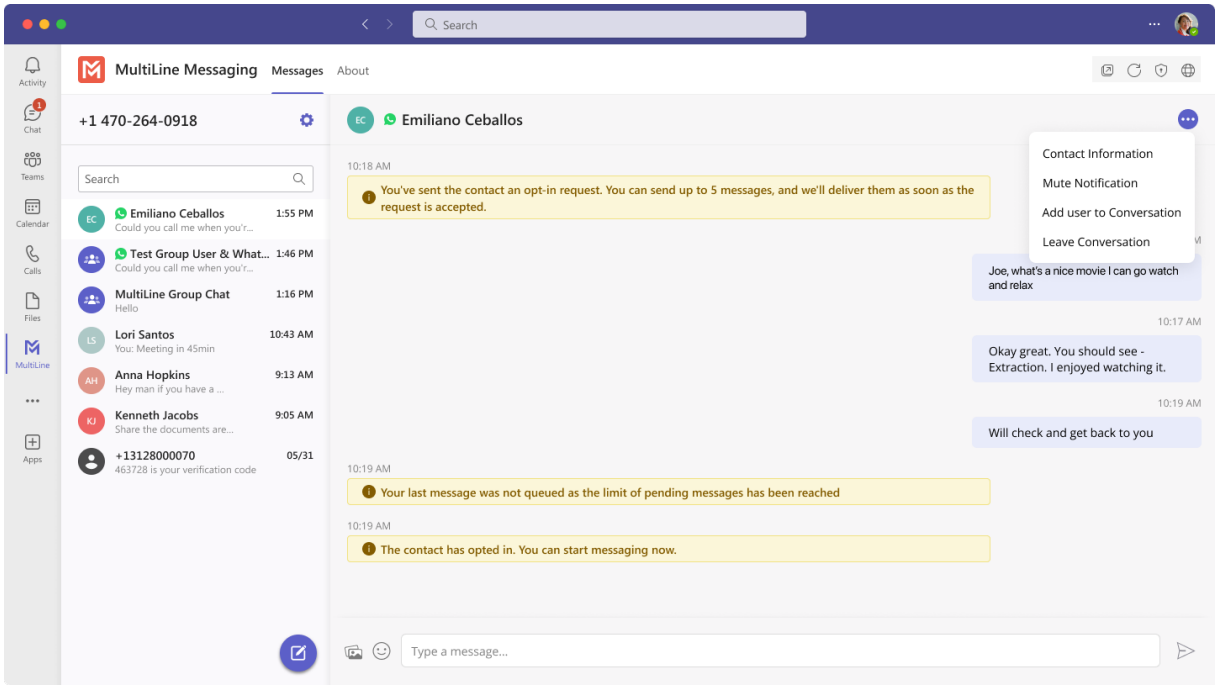
You can find your WeChat conversation with a contact by selecting the WeChat icon from the Contact details screen.

Leave a Conversation

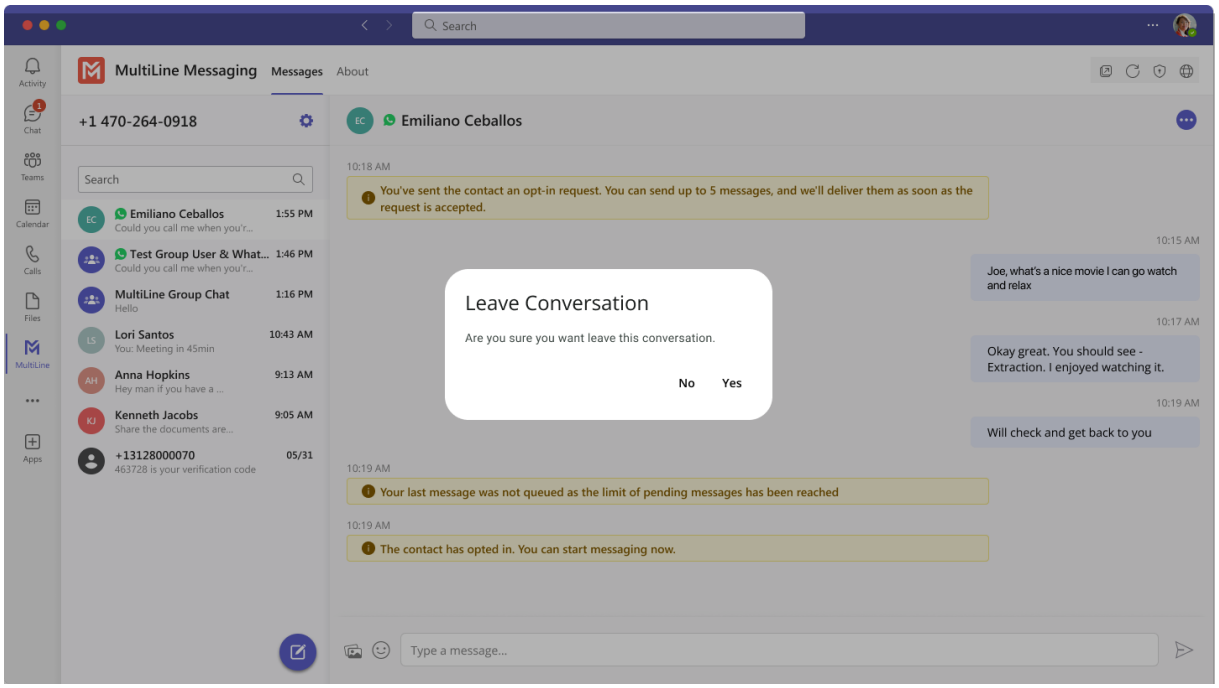
> Feature becomes available in July 7th Release.

WeChat limits the number of business users who can speak with WeChat users. To allow other people in your business to message with a WeChat user, you can leave the conversation when you're done with your interaction.

1. Select the **Message** menu.
2. Select **Leave Conversation**.



3. Confirm you want to leave the conversation.



When complete, both users will see an automessage letting them know you left the conversation.

You've sent the contact an opt-in request. You can send up to 5 messages, and we'll deliver them as soon as the request is accepted.
10:15 AM
Joe, what's a nice movie I can go watch and relax
10:17 AM
Okay great. You should see - Extraction. I enjoyed watching it.
10:19 AM
Will check and get back to you
10:19 AM
Your last message was not queued as the limit of pending messages has been reached
10:19 AM
The contact has opted in. You can start messaging now.
10:19 AM
You left the conversation..
