

How do I leave a social messaging conversation?

Last Modified on 08/22/2024 7:13 pm EDT

Sometimes you may want to leave a social messaging conversation, whether it is a 1:1 or group message. Leaving a social messaging conversation is required before you're able to delete messages in MultiLine applications.

The **Leave Conversation** option is available in the ... menu.

At the prompt, confirm you want to delete the message.
