

Default Country Calling Code

Last Modified on 10/16/2024 3:18 pm EDT

MultiLine uses the default country code as the assumed country code if you do not dial a country code manually

MultiLine/MultiLine for Intune

Read on to learn how to set the default country calling code.

Currently this setting is only available in Movius for BlackBerry. MultiLine and MultiLine for Intune will be adding in a future release.

Movius for BlackBerry

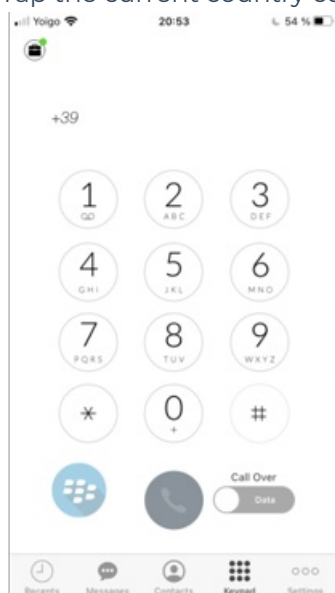

Read on to learn how to set the default country calling code.

Overview

A country calling code, or country dial-in code, is a prefix dialed before the telephone number when placing an international call. For example +39 is the calling code for Italy. By default, the prefix will reflect the country code of your MultiLine number.

Set the default country code

1. Open the dialer.
2. Tap the current country code (example below: +39).

3. Tap from the list to select the desired country calling code.
