

## Version 4.04.02 | Android

Last Modified on 11/06/2024 5:05 pm EST

### MultiLine Android App v. 4.04.02 Release Notes

This version of MultiLine is planned for mid-November.

#### What's New?

This release includes updates that enhance local and international calling and makes it easier to unsubscribe from unwanted messages and report spam.

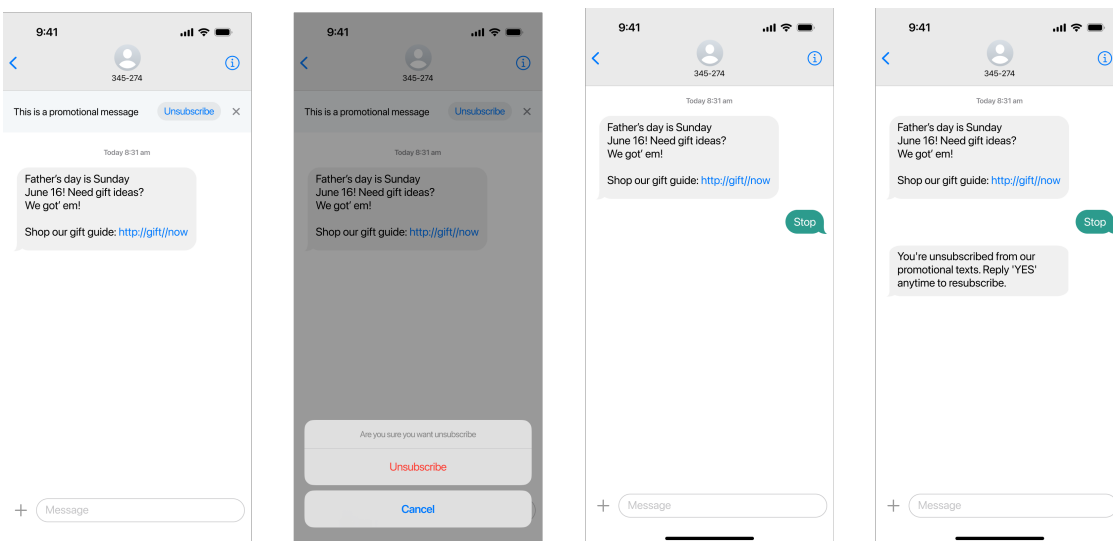

#### Number Formatting Enhancements

This release includes changes that are part of the implementation of the [E.164 international phone standard](https://en.m.wikipedia.org/wiki/Open_numbering_plan) ([https://en.m.wikipedia.org/wiki/Open\\_numbering\\_plan](https://en.m.wikipedia.org/wiki/Open_numbering_plan)), which enhances the way the MultiLine mobile application handles phone number formats. Now when someone enters a number for a new contact or dials a number, MultiLine will correct common formatting errors such as missing area codes or extra spaces, suggest a number in the correct format, and normalize the number according to the standard. This prevents errors when sending messages or making calls to international numbers.

#### Flag Application-to-Person (A2P) Messaging

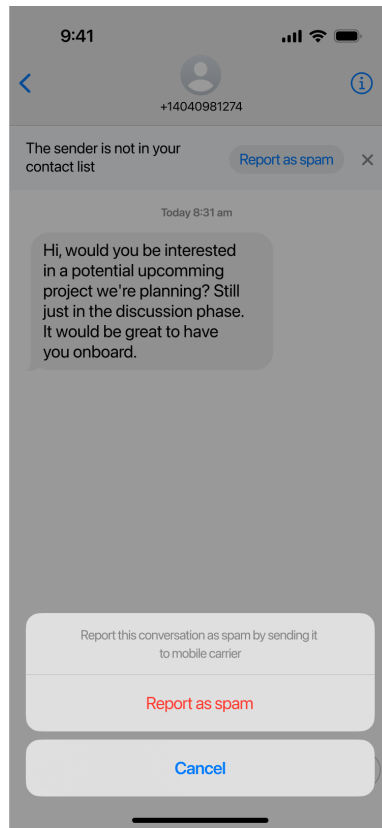

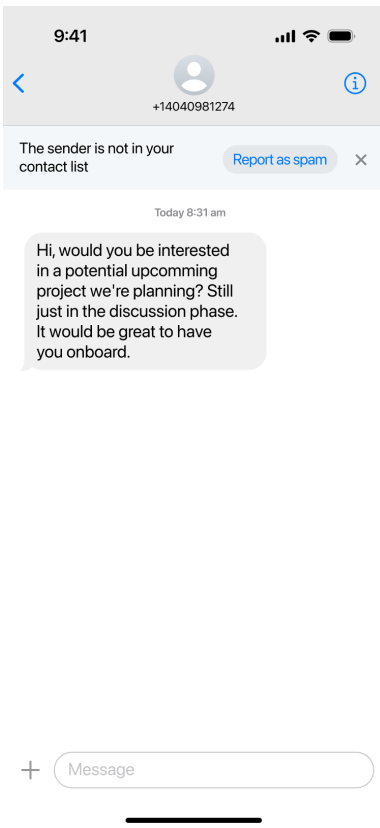

Carriers flag A2P (Application-to-Person) messages from businesses or automated systems—such as appointment reminders, promotions, and alerts—to prevent spam and protect consumers from being overwhelmed by unwanted messages.

MultiLine will now display a banner with an "Unsubscribe" button for A2P messages. When selected, MultiLine will automatically send "STOP" to the sender. MultiLine will deliver the received confirmation message.

#### SMS Spam Reporting (USA Only)

Whenever MultiLine users receive SMS from any numbers not in their contact list, MultiLine will now display a banner with a "Report as spam" button. When selected, MultiLine will report the spam for the user by sending the message and the sender's information to the mobile carrier.

## Bug Fixes

ID	Description
CS-233181	Fix for crash when press and holding web preview
CS-233183	Fix for erroneous country code added to number
