Issue dialing a local number

Last Modified on 11/01/2024 6:52 pm EDT

In rare cases, dialing numbers in local format (rather than the [E.164 international phone standard](https://en.wikipedia.org/wiki/E.164) ⤴ [(https://en.wikipedia.org/wiki/E.164)](https://en.wikipedia.org/wiki/E.164) ⤴) may be interpreted as international numbers. If you encounter any issues dialing a local number, please try redialing it with the country code included (e.g., "+1" for the United States).
