Version 4.05.02 | iOS

MultiLine iOS App v. 4.05.02 Release Notes

This is the content of the Version 4.05.02 release of MultiLine and MultiLine for Intune iOS apps.

What's New?

Handling Calls to Shortcodes

This release adds capabilities to handle calls to short codes. These capabilities will improve access to local services, allowing MultiLine user to dial shortcode numbers relevant to their region, enabling seamless access to customer support, non-emergency services, and other resources. Changes include:

- MultiLine will now handle calls to shortcode numbers (7 digits or less) by directly routing them to the native dialer.
- Keypad logic is enhanced to prevent incorrect country code addition to short codes and emergency numbers.

See Number handling of short codes (https://help.moviuscorp.com/help/number-handling-of-short-codes-552bf20-number-handling-of-short-codes) ↗ for more information.

Support for Canadian French

MultiLine apps now support Canadian French for labels and error messages in the app. The app will use the language set on the iOS.

Bug Fixes

ID	App	Description
CS-233068	MultiLine for Intune	Support for STOP SMS
CS-233181	MultiLine, MultiLine for Intune	Fix for webpage preview using press and hold crashes MultiLine
