About MultiLine Messages - iOS

Last Modified on 01/28/2025 12:11 pm EST

Read on to learn about the messaging using the MultiLine iOS apps.
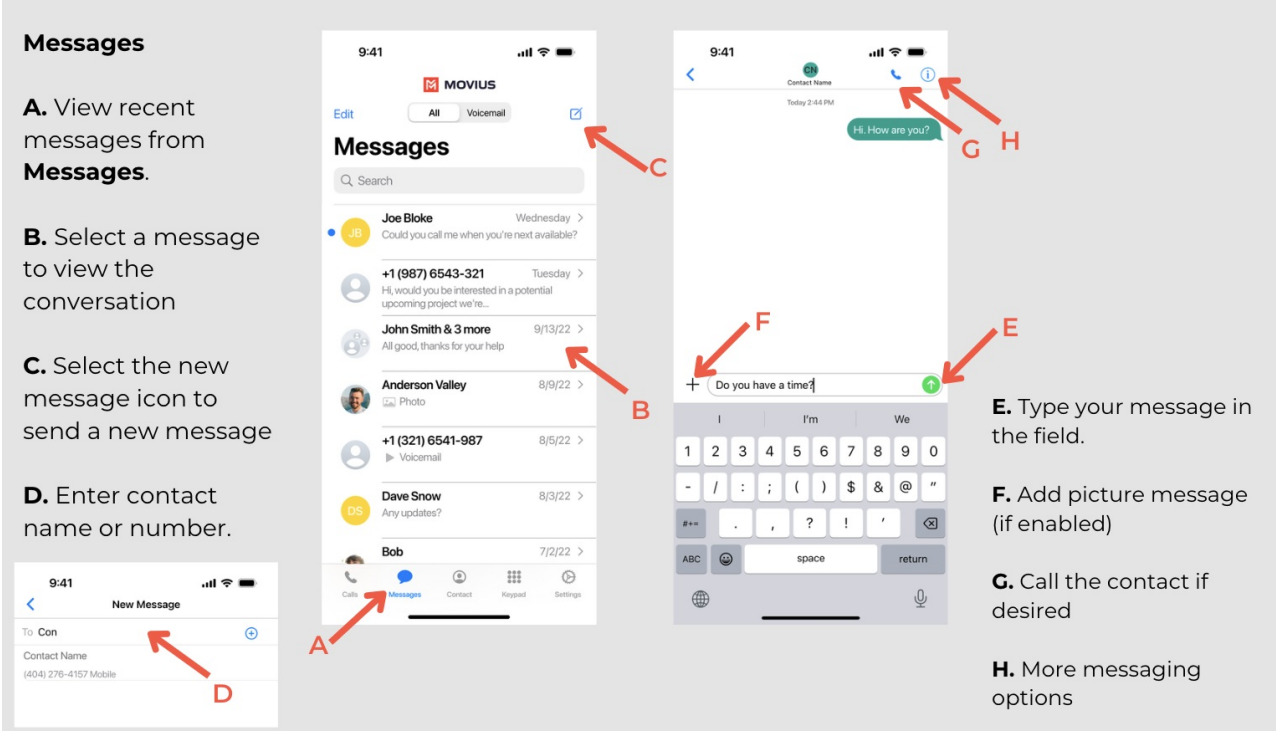

Overview

MultiLine is an application that allows you to use your work number for sending messages, including social messages.

Before you start

- You can only use the messaging services enabled by your MultiLine administrator. If they are not enabled, you won't be able to use them.

About Messages

- Messages is the second item in the MultiLine menu.
- This is where you can find all your conversations, SMS, group messages, social messages, and voicemail messages.

Messages

A. View recent messages from **Messages**.

B. Select a message to view the conversation

C. Select the new message icon to send a new message

D. Enter contact name or number.

E. Type your message in the field.

F. Add picture message (if enabled)

G. Call the contact if desired

H. More messaging options
