

## About Contacts

Last Modified on 02/18/2025 2:11 pm EST

Read on to learn about Contacts in the MultiLine Android mobile app.

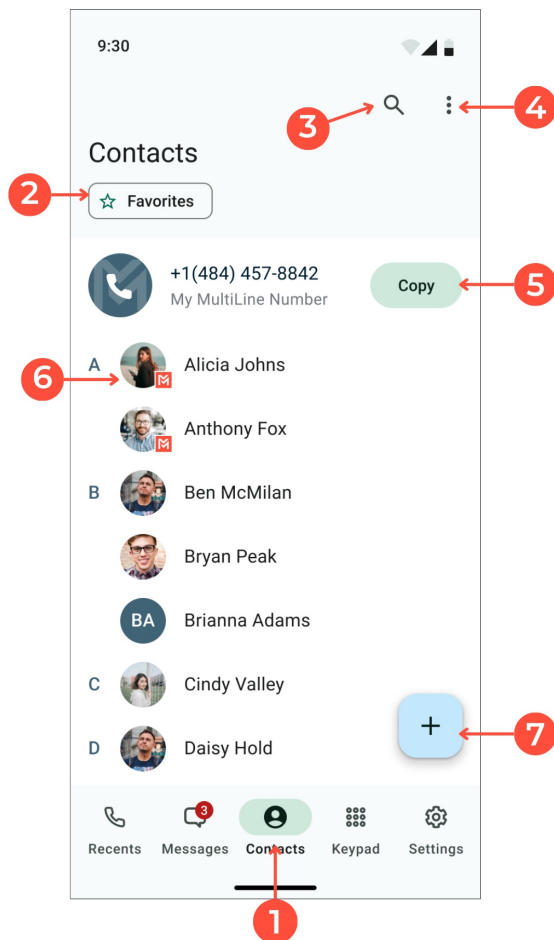

### Overview

Like any calling and messaging application, MultiLine offers the ability to store a list of contact information. MultiLine lets you choose the source of your contacts, you can add locally, sync with your device contacts, or sync with Exchange contacts.

### Before you start

- Your company's MultiLine admin can enable or disable:
  - which types of contact sources you can use
  - whether you see the MultiLine indicator for your contacts
- If you have any questions about what features your MultiLine admin has enabled, you should [contact the admin using the Help feature](https://help.moviuscorp.com/help/how-do-i-contact-support-ios)  (<https://help.moviuscorp.com/help/how-do-i-contact-support-ios>) 

### Contacts Screen

1. Access Contacts list
  2. Show only favorited contacts
  3. Search Contacts (See [Search and view contacts - Android](https://help.moviuscorp.com/help/search-view-and-edit-contacts-android)  (<https://help.moviuscorp.com/help/search-view-and-edit-contacts-android>) )
  4. Edit Contact list
  5. Copy MultiLine number
  6. MultiLine indicators show contacts with work numbers (See [What does the orange M icon \(MultiLine Indicator\) mean?](https://help.moviuscorp.com/help/what-does-the-orange-m-badge-multiline-indicator-mean)  (<https://help.moviuscorp.com/help/what-does-the-orange-m-badge-multiline-indicator-mean>) )
  7. Add a contact (See [Add, Edit, or Delete Contacts](https://help.moviuscorp.com/help/adding-or-updating-a-contact-30c1615)  (<https://help.moviuscorp.com/help/adding-or-updating-a-contact-30c1615>) )
