About Contacts - Android

Last Modified on 02/18/2025 2:09 pm EST

Read on to learn about Contacts in the MultiLine Android mobile app.
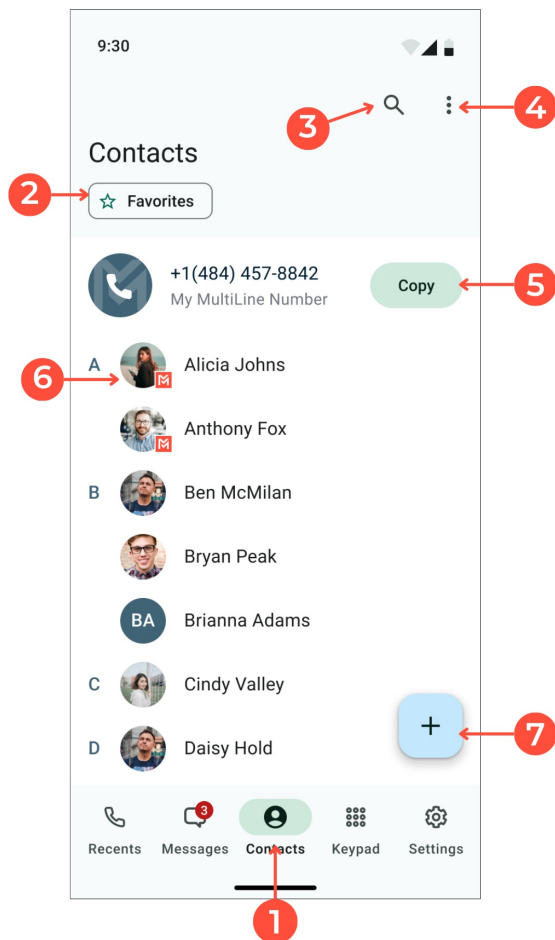

Overview

Like any calling and messaging application, MultiLine offers the ability to store a list of contact information. MultiLine lets you choose the source of your contacts, you can add locally, sync with your device contacts, or sync with Exchange contacts.

Before you start

- Your company's MultiLine admin can enable or disable:
    - which types of contact sources you can use
    - whether you see the MultiLine indicator for your contacts
- If you have any questions about what features your MultiLine admin has enabled, you should contact the admin using the Help feature ↗ (https://help.moviuscorp.com/help/how-do-i-contact-support-ios) ↗.

Contacts Screen

1. Access Contacts list

2. Show only favorited contacts

3. Search Contacts (See Search and view contacts - Android ↗ (https://help.moviuscorp.com/help/search-view-and-edit-contacts-android) ↗)

4. Edit Contact list

5. Copy MultiLine number

6. MultiLine indicators show contacts with work numbers (See What does the orange M icon (MultiLine Indicator) mean? ↗ (https://help.moviuscorp.com/help/what-does-the-orange-m-badge-multiline-indicator-mean) ↗)

7. Add a contact (See Add, Edit, or Delete Contacts ↗ (https://help.moviuscorp.com/help/adding-or-updating-a-contact-30c1615) ↗)
