

Version-4.53.1-HF3-Platform-Release-Notes

Last Modified on 08/22/2025 3:49 am EDT

Deployment Date: August 23, 2025

Bug Fixes:

Spam Check Flexibility: Organizations can now be added to a new `spam_check_ignore_list`.

When an orgid is included, the platform will **skip the TrueCNAM spam check** for guest MT calls, reducing unnecessary validations for trusted organizations.
