

Version 4.12.01 | iOS MultiLine and MultiLine for Intune Release

Last Modified on 12/22/2025 7:27 am EST

MultiLine iOS App v. 4.12.01 Release Notes

Target dates for the releases:

- MultiLine for Intune | November 17, 2025 (subject to App Store approval)
- MultiLine | September 28, 2025

What's new?

1. T-Satellite Network support

- The MultiLine mobile app now supports T-Satellite Phone Service from T-Mobile on devices with this capability, allowing for seamless connectivity in open areas where traditional cellular or Wi-Fi coverage is not available.
- When connected via satellite, users can send and receive messages via SMS, MMS, WhatsApp, WeChat, and LINE, as well as access voicemail.
- Initially, while on the satellite network, specific functions such as voice calls, Exchange contact sync, and onboarding will be disabled due to satellite bandwidth restrictions.
- The app will provide feedback when these features are unavailable.

See [Using MultiLine on Satellite Network](https://help.moviuscorp.com/help/using-multiline-mobile-app-on-satellite-network-september-2025) (<https://help.moviuscorp.com/help/using-multiline-mobile-app-on-satellite-network-september-2025>) [🔗](#) for more information.

2. Updated Microsoft Intune SDK

- We've upgraded the Intune SDK to version 21.1.0.

Bug Fixes

- Fixed an issue that caused the app to unexpectedly close when tapping on the Messages icon.
- Resolved an issue that led the app to close shortly after it was opened.
- Fixed an issue in a specific scenario where the app would unexpectedly close when a user attempted to add a third number to an existing contact from Call Details using the "Add to Existing Contact" feature.
- Resolved an issue where some users were unable to successfully save a number to an existing contact when using the "Add to Existing Contact" option from Call Details.
- Fixed an issue where messages from some senders would display a SIP code instead of the sender's name or phone number.
- Addressed a slight delay experienced by users where sent messages would take approximately one second to appear in the message thread after tapping send.
