MOVIUS

Version 4.57.1 | Emerald HF1 | Platform Release Notes

Last Modified on 12/11/2025 1:01 am EST

Deployment Date: Dec 12, 2025

Bug Fixes:

- **Caller Metadata Normalisation**

Fixed inconsistency in call records where unknown callers appeared as "unknown" or "anonymous". Caller field now consistently shows "anonymous" for unknown callers.

- **Location Messaging Restriction**

Resolved issue where users received location messages from WhatsApp Guest even when location was disabled in the portal. Entitlement checks enforced and unnecessary IDs removed.
